

Lakewood Elementary has and will continue to follow the district policy on electronics. To ensure that no misunderstanding occurs relating to this issue, we consider a Kindle, Nook, tablet or even a cell phone to fit into the district's set position on the student's use of electronics. Please check out the district's policy at http://www.hvs.org/district/technology/byod/parents-students/.

As technology is becoming more and more a part of our lives, we at Lakewood realize that many devices can be used in the classrooms to enhance the educational experience for our students. We are moving forward with the integration of technology while limiting the amount of distractions that may be created in the learning environment.

Student possession of an electronic device in the building is allowed and subject to the discretion of the classroom teacher. The administrative staff, along with the classroom teacher, reserves the right to define the educational value of any new electronic devices that may become available in the future, and to prohibit or allow their use accordingly. Possession of an electronic device by a student is a privilege and will be forfeited by any student not following school policies and/or classroom protocols. A student using a device without permission or in an inappropriate fashion will result in the device being confiscated by staff and turned in to the principal. Parents will be called and will be responsible for picking the device up in the office.

A secure location will be designated in the classroom of each teacher who is participating in our BYOD program. The student is personally responsible for the safety and security of their electronic device when it is not secured by the classroom teacher.

I understand that Lakewood Elementary School and staff members are not responsible for lost or damaged devices brought to school by students.	
I have read the statement above and will classroom teacher.	adhere to the agreement with the school and
